

BlueCoast

Climate - Smart Coastal Practices for Blue Governance

FREE e-LEARNING COURSE

Climate Change and Blue Growth

Sign up: elearning.biopolitics.gr

Registration: June 18 – July 6, 2020

Duration: July 6 – August 30, 2020 (8 weeks / 70 hours)

Course content:

The course offers an extensive overview of how climate change affects our seas and oceans, rules and regulations governing ocean use, ways in which a Blue Economy can be achieved, and what responses and solutions are available to inspire and mobilize people everywhere to become stewards of our planet.

This course is for:

Tourism and environmental professionals, journalists and media workers, private and public sector actors, members of civil society organizations, practitioners concerned with the preservation and conservation of the oceans, students and graduate students.

A Certificate of Participation will be issued
